The Law of Business Organizations - Robert W. Hamilton 2014-06-05
This title covers the law of business associations for introductory courses. It discusses business organizations, including agency, general partnerships, closely held corporations, publicly held corporations, limited partnerships, limited liability partnerships, and limited liability companies. The material on the unincorporated business forms has been revised, updated, and expanded to reflect the centrality of these forms of business organization in modern law practice and in the economy generally. Among other state and model statutes, the Revised Uniform LLC Act (2006), the Revised Uniform Partnership Act (1997), the Uniform Limited Partnership Act (2001), and the Third Restatement of Agency (2006) are discussed and cited.

Business Enterprises: Legal Structures, Governance, and Policy - Douglas M. Branson 2012-08-06
This book undertakes a traditional, and inclusive, approach to the law of business organizations. The volume includes materials many books now on the market omit, such as agency and unincorporated business associations, while at the same time maintaining a wide breadth of coverage. As such, the book permits professors to emphasize closely held and other non-public companies while at the same time offering the basics on public company law and practice. Along these lines, the book includes materials on securities offerings, registration, exemptions from registration, and lawyers' responsibilities under the securities laws. Features that make this book a strong teaching tool and a strong learning tool include: • Chapter introductions that summarize and highlight the overall and contextual importance of chapter contents (rather than merely list and categorize the parts of the chapter); • Basic corporate finance nomenclature and other information necessary to an understanding of transactional business law, including individual chapters on basic corporate finance, corporate changes and change of control transactions; • Materials allowing for a comparison of laws and practices in other countries with those of the United States in key areas of study; and • Well-selected notes and problems that permit the integration of concepts and foster application skills at key junctures. This single text allows for coverage of law, underlying theory and policy, and practice skills. In one volume, the book contains material sufficient to educate a young lawyer to function in general business law practice. The emphasis has been on creating a teaching resource that is comprehensive in the view of the five experienced business law teacher-practitioner authors. This eBook features links to Lexis Advance for further legal research options.

Cost-Benefit Analysis - Euston Quah 2011-10-20
Cost-benefit analysis (CBA) is the systematic and analytical process of comparing benefits and costs in evaluating the desirability of a project or programme, often of a social nature and for society as a whole. CBA is fundamental to government decision-making and can be an effective tool for informed decisions on the use of society's scarce resources. This book highlights the main concepts and principles of cost-benefit analysis used in real life cases and actual applications. The book contains rich cases, materials and examples of real life CBA applications with emphasis both on physical and non-physical projects and infrastructure developments in Asia and beyond. The book also discusses techniques frequently used in applied CBA. The first part of the book introduces the key concepts and principles of CBA before Part Two covers some pertinent issues relating to CBA, such as the recent trend of using behavioural economics and frequently used...
techniques in applied CBA. Finally, in Part Three, case studies are written up to illustrate how CBA is done, and questions for the readers and students to ponder are raised at the end of each chapter. The scope of the case studies is more than just physical infrastructures but will include public sector policies and programmes covering a host of social policies as in health, education, social welfare programmes, and the environment. For each case, there will be illustrations of the key concepts and principles of CBA used. Undertakings analyzed include: the Three Gorges Dam in China the 2008 Beijing Olympics the Costs of Global Warming the Jamuna Bridge in Bangladesh The case studies, many of which have taken or are to take place in developing countries provide a rich background to the principles of the method, and are accompanied by a wealth of explanatory material. As well as being suitable for courses in Cost-Benefit Analysis, Public Finance, Environmental and Health Economics, the book should be of interest to all public policy decision makers and planners.

Administrative Law-Daniel J. Gifford 2010-01-01

Cases and Materials on California Community Property-Gail Boreman Bird 2008 Traces the historical development of the community property concept. Also introduces basic classification principles, including limitations on the classification process. The remaining chapters deal with the consequences flowing from the classification of property as community or separate, including management and control rights and responsibilities, creditors’ rights, and distribution of property on the termination of the community. The 9th Edition contains a new section dealing with same-sex unions and domestic partnership legislation. Further ramifications and problems are explored in the notes to the cases.

International Law-Lori Fisler Damrosch 2001 Updated with an emphasis on current issues, this classic casebook emphasizes developments in international law, with expertly edited cases and problems for class discussion. Cases and

Materials on International Law offers a treatment of the subject for introductory and advanced classes and detailed readings and reference materials for those who wish to pursue topics in depth. The fourth edition enriches every chapter with new information on institutions contributing to the sources and enforcement of international law, including the World Trade Organization, the International Criminal Tribunals for Yugoslavia and Rwanda, the prospective International Criminal Court, and organizations in the fields of law of the sea and arms control. International criminal law now has a chapter of its own, and the casebook gives expanded treatment to human rights, environmental law, and economic law.

Text, Cases and Materials on Public Law and Human Rights-Helen Fenwick 2013-03-04 Building on the strengths of the Sourcebook on Public Law, this book has been comprehensively revised to take account of the radical programme of constitutional reform introduced by the Labour Government since 1997.

Business Reorganization in Bankruptcy-Mark S. Scarberry 2012 This thoroughly updated casebook is designed for Chapter 11 bankruptcy courses, and it is also suitable for general courses focusing on business bankruptcy. The fourth edition retains the basic approach of the earlier editions. It presents a hypothetical company in some detail (including financial statements) and follows that company through the process of reorganization, from attempted workout to plan confirmation. It provides students with the foundation for a business bankruptcy practice: a solid grounding in the law; an orientation to the business issues; and a step-by-step view of the process that may be able to rescue a financially distressed business, either by a traditional reorganization or a sale of the business as a going concern. The treatment of the avoiding powers has been particularly strengthened
In less than 100 years, international organizations have evolved from curiosities into keystones of international law. What began long ago as an unremarkable effort to coordinate a limited number of technical issues has grown into a global, multilevel, blended governing project with diverse competences in most fields of human endeavor and interests. Law graduates who enter the field of international law, as well as political science, international relations, and diplomacy, are increasingly expected to have a strong knowledge of the law of international organizations. Beyond knowledge, graduates are also expected to be able to solve new emerging legal problems confronting organizations. This book introduces students to the law of international organizations through the careful study of the most recent cases and other materials from the International Court of Justice, United Nations Security Council and General Assembly, World Trade Organization, international criminal tribunals, European Union, European Court of Human Rights, International Labour Organization, various domestic courts and arbitral panels, and other bodies. In doing so, it undertakes a critical examination of legal rights and duties, exposing the fundamental questions that arise when addressing a range of issues within an organization. In order to provide the best foundation, the textbook focuses on several key topics: the law of treaties, creation of organizations, membership, powers of organizations, legal effects of their acts, organs, immunities, and responsibility. This book is best suited for students who are studying international organizations and who have already had one or more courses on international and/or European law.
the general principles, before the facts of each case are summarised and the extracts of the relevant parts of judgments reproduced. The significance of the judicial extracts, the statutory materials and standard terms are then discussed with particular emphasis on important and problematical areas of the law. This book will be indispensable not only to postgraduate students of law, in-house lawyers, insurance brokers and claims adjusters, but also to students of maritime studies, legal practitioners and a wide range of professionals within the shipping industry who may wish to have at hand a convenient source of information. Whilst the book is a companion to the authors The Law of Marine Insurance, it is also structured to stand as a marine insurance text in its own right.

Cases and Materials on Business Entities - Eric A. Chiappinelli 2018-03-30

Intended for the basic course in Business Organizations, Cases and Materials on Business Entities encompasses corporations, agency, partnership, and LLCs. Its extended coverage of alternative business entities distinguishes it from the more limited corporations-focused coverage of many business organizations texts. The author includes elaborate problems designed to help students become practice-ready as well as enhanced coverage of LLCs and principal cases that were decided within the last 20 years. The recipient of numerous teaching awards and a former clerk at the California Supreme Court and the U.S. District court, author Eric Chiappinelli has taught, written, and practiced extensively in business entities, corporate law, securities regulation, and civil procedure. Key Features: Over 20 new cases, including Shawe v. Elting (Del. 2017). All principal cases are less than 20 years old. Corporation chapters reflect MBCA (2016), and Partnership materials reflect UPA (2013). LLC chapter has been revised and updated. New materials on ultra vires and ultimate beneficiaries. New discussion of DGCL §§ 204 and 205 and MBCA (2016) Subchapter E (ratifying defective acts) New real-life examples: Kate Spade acquired by Coach and Toys "R" Us bankruptcy.
