Serial Crime-Wayne Petherick 2009-06-13
Serial Crime, Second Edition, examines serial predatory behavior and is divided into two main parts. Part one deals with behavioral profiling, and covers a variety of critical issues from the history of profiling and the theoretical schools of thought to its treatment in the mainstream media. This updated edition includes new sections on the problems of induction, metacognition in criminal profiling, and investigative relevance. Part two deals more specifically with a number of types of serial crime including stalking, rape, murder, and arson. Chapters on each of these crimes provide definitions and thresholds, and discussions of the offenders, the crime, and its dynamics. Considerations for behavioral profiling and investigations and the development of new paradigms in each area are interwoven throughout. Topics are conceptually and practically related since profiling has typically seen most application in serial crimes and similar investigations. The unique presentation of the book successfully connects the concepts and creates links to criminal behavior across crimes—murder, sexual assault, and arson—something no other title does. The connection of serial behavior to profiling, the most useful tool in discovering behavior patterns, is also new to the body of literature available and serves to examine the ideal manner in which profiling can be used in conjunction with behavioral science to positively affect criminal investigations.* Provides a theoretical and practical foundation for understanding the motivation and dynamics in a range of serial offenses * Illustrates the promise, purposes and pitfalls of behavioral profiling in the investigation of various serial crimes * Numerous case examples show the real world uses of behavioral profiling in investigations, as well as highlighting a variety of issues in understanding and investigating serial crime

Criminology and Criminal Profiling for Beginners-Illaria Cabula 2020-02-25 Nowadays we hear very often about criminology, serial killers and heinous murders. We hear about them on the news, cinema, literature, video games; the serial murderer has now polarized a good part of the media expression. Who has never heard of Dr. Hannibal Lecter, or Dexter Morgan? And who has never seen an episode of CSI? But how much truth is there? How do serial killers act? How do they choose their victims? And why do they kill? Do investigation techniques really work as we see in TV shows? These questions find their answers in this book, perfect for anyone who wants to approach the study of this discipline. The first six chapters deal with the origins of criminology, the analysis of the different categories of serial killers and the numerous investigation techniques used during the crime scene analysis. The remaining four chapters focus on the analysis of the phenomenon of satanic sects: the mental manipulation techniques used by sects, how they choose their victims and their influence on society and young people. Good reading!

It also includes a discussion of the media approach to covering serial homicide. The Brief is divided into four major sections covering: definitions and overview of serial homicide, profiling perpetrators according to different typologies, profiling victims, applied case studies, and recommendations for investigation and prevention. **Criminal Profiling** - Richard N. Kocsis 2007-11-03 Criminal Profiling: Principles and Practice provides a compendium of original scientific research on constructing a criminal profile for crimes that are not readily resolvable by conventional police investigative methods. Leading profiling expert Richard N. Kocsis, PhD, utilizes a distinct approach referred to as Crime Action Profiling (CAP), a technique that has its foundations in the disciplinary knowledge of forensic psychology. The initial four chapters examine the skills, accuracy, components, and processes surrounding the construction of a criminal profile. The next two chapters focus on CAP research, the methods developed for the profiling of violent crimes and describing a systematic method for the interpretation and use of the CAP models. The subsequent three chapters canvass the respective CAP studies undertaken for crimes of serial rape, serial/sexual murder, and serial arson. An explanation for how each of the models is developed is also given. The final chapters of the book are devoted to the geographical analysis of crime patterns and to a discussion of the format conventions and procedural guidelines for developing a criminal profile. Offering a scientifically grounded method for the construction of a criminal profile, Criminal Profiling: Principles and Practice provides law enforcement personnel, forensic psychologists and psychiatrists, criminologists, and forensic investigators with a step-by-step, practical guide for understanding and applying CAP techniques for the construction of a criminal profile in a systematic and replicable manner.

**Serial Violence** - Robert D. Keppel 2008-12-22 Linking the murders of an alleged serial killer to successfully present a case in court involves a specific methodology that has been scrutinized by the judicial system but is largely absent in the current literature. Serial Violence: Analysis of Modus Operandi and Signature Characteristics of Killers fully explains the process of finding the nexus between one violent crime and another for the purpose of pursuing the same offender at trial. Examines real cases of some of the world’s most notorious serial killers Written by renowned experts, this book focuses on analyzing crimes of violence to unveil common characteristics that might prove useful in the identification, apprehension, and conviction of murderers. It begins by detailing the historical origins of modus operandi as an investigative tool. It examines murderous ritualistic behavior in a variety of cases, including William Heirens, Harvey Glatman, Morris Frampton, and Jack the Ripper. Later chapters discuss serial murders accompanied by burglary, torture, picquerism, sexual violence, sexual degradation, and a host of other behaviors. Includes color photographs of actual crime scenes Containing numerous color photos, this volume includes useful information for expert witnesses and portions of transcripts of original testimony. The scintillating detail and rigorous analysis presented in this volume enables those charged with solving these violent crimes to discern the types of modus operandi and ritualistic behaviors that can be linked to the same offender, helping law enforcement bring these dangerous offenders to justice. About the Authors Bob Keppel served on the King County homicide task force that investigated the infamous Ted Bundy and has been an expert witness on scores of serial killer signature profile cases across the United States. Along with coauthor William Birnes, Dr. Keppel worked on a United States Department of Justice grant to evaluate how local police homicide units use computer database technology to track serial killer and sexual offender cases by cross-referencing offender psychological signatures.

Why We Love Serial Killers-Scott Bonn 2014-10-28 For decades now, serial killers have taken center stage in the news and entertainment media. The coverage of real-life murderers such as Ted Bundy and Jeffrey Dahmer has transformed them into ghoulish celebrities. Similarly, the popularity of fictional characters such as Hannibal “The Cannibal” Lecter or Dexter demonstrates just how eager the public is to be frightened by these human predators. But why is this so? Could it be that some of us have a gruesome fascination with serial killers for the same reasons we might morbidly stare at a catastrophic automobile accident? Or is it something more? In Why We Love Serial Killers, criminology professor Dr. Scott Bonn explores our powerful appetite for the macabre, while also providing new and unique insights into the world of the serial killer, including those he has gained from his correspondence with two of the world's most notorious examples, David Berkowitz (“Son of Sam”) and Dennis Rader (“Bind, Torture, Kill”).

In addition, Bonn examines the criminal profiling techniques used by law enforcement professionals to identify and apprehend serial predators, he discusses the various behaviors—such as the charisma of the sociopath—that manifest themselves in serial killers, and he explains how and why these killers often become popular cultural figures. Groundbreaking in its approach, Why We Love Serial Killers is a compelling look at how the media, law enforcement agencies, and public perception itself shapes and feeds the “monsters” in our midst.

Serial Murder and the Psychology of Violent Crimes-Richard N. Kocsis 2008-01-08 This book brings together an international collection of research literature on the topics of criminal profiling and serial violent crime by integrating the respected insights of both scholars and practitioners from around the globe. It explains etiological factors and psychological mechanisms to reveal criminal motives.

The Profiler-Pat Brown 2010-05-18 In 1990, a young woman was strangled on a jogging path near the home of Pat Brown and her family. Brown suspected the young man who was renting a room in her house, and quickly uncovered strong evidence that pointed to him—but the police dismissed her as merely a housewife with an overactive imagination. It would be six years before her former boarder would be brought in for questioning, but the night Brown took action to solve the murder was the beginning of her life's work. Pat Brown is now one of the nation's few female criminal profilers—a sleuth who assists police departments and victims' families by analyzing both physical and behavioral evidence to make the most scientific determination possible about who committed a crime. Brown has analyzed many dozens of seemingly hopeless cases and brought new investigative avenues to light. In The Profiler, Brown opens her case files to take readers behind the scenes of bizarre sex crimes, domestic murders, and mysterious deaths, going face-to-face with killers, rapists, and brutalized victims. It's a rare, up-close, first-person look at the real world of police and profilers as they investigate crimes--the good and bad, the cover-ups and the successes.
Killer’s Shadow - John E. Douglas 2020-11-17
The legendary FBI criminal profiler and international bestselling author of Mindhunter and The Killer Across the Table returns with this timely, relevant book that goes to the heart of extremism and domestic terrorism, examining in-depth his chilling pursuit of, and eventual prison confrontation with Joseph Paul Franklin, a White Nationalist serial killer and one of the most disturbing psychopaths he has ever encountered. Worshippers stream out of an Midwestern synagogue after sabbath services, unaware that only a hundred yards away, an expert marksman and avowed racist, antisemite and member of the Ku Klux Klan, patiently awaits, his hunting rifle at the ready. The October 8, 1977 shooting was a forerunner to the tragedies and divisiveness that plague us today. John Douglas, the FBI’s pioneering, first full-time criminal profiler, hunted the shooter—a white supremacist named Joseph Paul Franklin, whose Nazi-inspired beliefs propelled a three-year reign of terror across the United States, targeting African Americans, Jews, and interracial couples. In addition, Franklin bombed the home of Jewish leader Morris Amitay, shot and paralyzed Hustler magazine publisher Larry Flynt, and seriously wounded civil rights leader Vernon Jordan. The fugitive supported his murderous spree robbing banks in five states, from Georgia to Ohio. Douglas and his writing partner Mark Olshaker return to this disturbing case that reached the highest levels of the Bureau, which was fearful Franklin would become a presidential assassin—and haunted him for years to come as the threat of copycat domestic terrorist killers increasingly became a reality. Detailing the dogged pursuit of Franklin that employed profiling, psychology and meticulous detective work, Douglas and Olshaker relate how the case was a make-or-break test for the still-experimental behavioral science unit and revealed a new type of, determined, mission-driven serial killer whose only motivation was hate. A riveting, cautionary tale rooted in history that continues to echo today, The Killer’s Shadow is a terrifying and essential exploration of the criminal personality in the vile grip of extremism and what happens when rage-filled speech evolves into deadly action and hatred of the “other” is allowed full reign. The Killer’s Shadow includes an 8-page color photo insert.

Hazelwood has helped track down some of the most violent and well-known criminals in modern history; in Dark Dreams he takes readers into his world-- a sinister world inhabited by scores of dangerous offenders for every Roy Hazelwood who would put them behind bars: * A young woman disappears from the convenience store where she works. Her skeletonized remains are found in a field, near a torture device. Who committed this heinous crime? And why? * A teenager’s body is found hanging in a storm sewer. His clothes are neatly folded by the entrance and a stopwatch is found in his mouth. Is he the victim of a bizarre, ritualistic murder…or an elaborate masturbatory fantasy gone awry? * A married couple, driving with their toddler in the backseat, pick up a female hitchhiker. They kidnap her and for seven years keep her as a sexual slave. The wife agreed to this inhuman arrangement in exchange for having a second child. Who was to blame? As gruesome as the crimes are and as unsettling as the odds seem, Hazelwood proves that the right amount of determination and logic can bring even the most cunning and devious criminals to justice. Dark Dreams is a 2002 Edgar Award Nominee for Best Fact Crime.

**Criminal & Behavioral Profiling** - Curt R. Bartol 2012-08-29 What is the job of a "criminal profiler" really like? We see these roles played out nightly on TV shows and in the news, but how does law enforcement today actually use empirical data to correctly assess behaviour and help solve crimes, particularly serial crimes? Criminal and Behavioral Profiling, written by well-established authors Curt and Anne Bartol, presents a realistic and empirically-based look at the theory, research, and practice of modern criminal profiling, or, as it’s more professionally termed, behavioural analysis or behavioural investigative analysis. Designed for use in a variety of criminal justice and psychology courses, the book delves into the process of identifying distinctive behavioural tendencies, geographical locations, demographic, and biographical descriptors of offenders, and personality traits, based on characteristics of the crime. In THE ANATOMY OF MOTIVE he uses cases from his own career to illustrate his argument. He takes us further than ever before into the dark corners of the minds of arsonists, hijackers, serial and spree killers and mass murderers. **Crime Classification Manual** - John Douglas 2011-01-06

**Details Are Unprintable** - Allan Levine 2020-10-01 The narrative of Details Are Unprintable primarily unfolds over a seven-month period from October 1943 to April 1944—from the moment the body of twenty-two-year old Patricia Burton Lonergan is discovered in the bedroom of her New York City Beekman Hill apartment, to the arrest of her husband of two years, Wayne Lonergan, for her murder, and his subsequent trial and conviction. But this story goes back in time to the 1920s, when Wayne Lonergan grew up in Toronto and then forward to his post-prison life following his deportation to Canada. It is the chronicle of Lonergan in denial as a bisexual or gay man living in an intolerant and morally superior heterosexual world; and of Patricia, rich and entitled, a seeker of attention, who loved a night out on the town—all set against the fast pace of New York’s ostentatious café society. Part True Crime and part a social history of New York City in the 1940s, this book transports readers to the New York World’s Fair of 1939 when Patricia’s father William Burton first encountered Lonergan; the Stork Club, 21 Club, and El Morocco to experience with Patricia a night of drinking champagne cocktails and dancing; and the muggy New York courtroom where Lonergan’s fate was decided. What truly happened on that tragic night in October 24, 1943? Should we accept Lonergan’s confession at face value as the jury did? Or was he indeed a victim of physical and mental abuse by the state prosecutors and the police, as he maintained for the rest of his life? This book considers these, and other, key questions.

OF THE FBI PROFILERS WHO COINED THE PHRASE "SERIAL KILLER" Face-to-face with some of America's most terrifying killers, FBI veteran Robert K. Ressler learned how to identify the unknown monsters who walk among us -- and put them behind bars. In Whoever Fights Monsters, Ressler—the inspiration for the character Agent Bill Tench in David Fincher's hit TV show Mindhunter—shows how he was able to track down some of the country's most brutal murderers. Ressler, the FBI Agent and ex-Army CID colonel who advised Thomas Harris on The Silence of the Lambs, used the evidence at a crime scene to put together a psychological profile of the killers. From the victims they choose to the way they kill to the often grotesque souvenirs they take with them—Ressler unlocks the identities of these vicious killers. And with his discovery that serial killers share certain violent behaviors, Ressler goes behind prison walls to hear bizarre first-hand stories from countless convicted murderers, including Ted Bundy, John Wayne Gacy; Edmund Kemper; and Son of Sam. Getting inside the mind of a killer to understand how and why he kills is one of the FBI's most effective ways of helping police bring in killers who are still at large. Join Ressler as he takes you on the hunt for the world's most dangerous psychopaths in this terrifying journey you will not forget.

Journey Into Darkness - John E. Douglas
1997-09-01 In the #1 New York Times bestseller Mindhunter, John Douglas, who headed the FBI's elite Investigative Support Unit, told the story of his brilliant and terrifying career tracking down some of the most heinous criminals in history. Now, in Journey into Darkness, Douglas profiles vicious serial killers, rapists, and child molesters. He is straightforward, blunt, often irreverent, and outspoken, but takes pains not to glorify any of these murderers. Some of the unique cases Douglas discusses include: -The Clairemont killer -The schoolgirl murders -Richmond's First Serial Murderer -The brutal and sadistic murder of Suzanne Marie Collins -Polly Klaas' abduction and murder by Richard Allen Davis, -The tragedy that lead to the creation of Megan's Law With Journey into Darkness, Douglas provides more than a glimpse into the minds of serial killers; he demonstrates what a powerful weapon behavioral science has become. Profiling criminals helps not only to capture them, but also helps society understand how these predators work and what can be done to prevent them from striking again. Douglas focuses especially on pedophiles and child abductors, fully explaining what drives them, and how to keep children away from them. As he points out, "The best way to protect your children is to know your enemy." He includes eight rules for safety, a list of steps parents can take to prevent child abduction and exploitation, tips on how to detect sexual exploitation, basic rules of safety for children, and a chart, based on age, which details the safety skills children should have to protect themselves. In his review for Mindhunter in The New York Times Book Review, Dean Koontz said, "Because of his insights and the power of the material, he leaves us shaken, gripped by a quiet grief for the innocent victims and anguished by the human condition." Journey into Darkness continues this perilous trip into the psyche of the serial killer, but also offers a glimmer of hope that profiling may enable law enforcement to see the indicators of a serial killer's mind and intervene before he kills, or kills again.

Profiling Violent Crimes - Ronald M Holmes 2002-03-12 On psychological profiling of criminals

Hunting Serial Predators - Grover Maurice Godwin 2018-01-18 The majority of the available published accounts of serial murderers are not in scholarly or technical publications. Even such few academic reviews as do exist typically commence with reference to fictional accounts so that the profile of a serial murderer is typically far from clear or precise. Hunting Serial Predators is unique in that each chapter, written in detail, explains how to research and interpret, psychologically, the crime scene actions of serial killers. The book provides the reader an empirical facet model of the crime scene actions of American serial murderers based on information available to a police inquiry; an overview of the related scientific knowledge, introducing a new method to classify the serial predator, and accounts of the process and difficulties of profiling the serial murderer. By presenting a classification model of serial murderers and their crime scene behaviors based on empirical and repeatable studies, this book makes significant advances in the areas of police investigations, etiology, and treatment possible. The empirical process used to analyze serial murderers' crime scene actions described in Hunting Serial Predators makes it possible to make logical decisions about how to detect, apprehend, and eventually access their dangerousness.

The Cases That Haunt Us - John Douglas
2012-12-25 Certain criminal cases have a life of their own. Despite the passage of years they continue their hold on the public imagination, either because of the personalities involved, the depravity of the crime, doubts over whether justice was done, or the tantalizing fact that no one was ever caught... Now John Douglas, the foremost investigative analyst and criminal profiler of our time, turns his attention to eight of the greatest mysteries in the history of crime, including those of Jack the Ripper, The Boston Strangler and JonBenet Ramsey. Taking a fresh look at the established facts, Douglas and Olshaker dismantle the conventional wisdom regarding these most notorious of crimes and rebuild them - with astonishing results.

Criminal Profiling - David Elio Malocco
2014-10-06 At last we have a good student introduction to the basics of criminal profiling from criminologist David Malocco, the best-selling author of Forensic Science: Crime Scene Analysis. The book is packed with information on all aspects of profiling and is completed with page upon page of references in the Bibliography section, a useful tool for any student. The book covers all aspects of the subject from the history of profiling to the different approaches and everything in between. Chapters 1 to 4 provide definitions, an overview and the history of profiling from the Middle Ages to date. Chapter 5 discusses criminologists such as Cesare Lombroso, Franz Joseph Gall, Enrico Ferri, Gerald Elton Fosbroke, Franz Von Liszt, Ludwig Fuld, Abraham Baer, Paul Nacke, Gustav Aschaffenburg, Erich Wulffen, and Ernst Kretschmer. Chapter 6 covers the birth of forensic science and the contributions made by Hans Gross and Sir Arthur Conan Doyle, the creator of fictional detective Sherlock Holmes. The next chapter deals with the Whitechapel Murders and the beginning of criminal profiles by medical doctors such as Dr. Bond in the Jack the Ripper cases. Chapter 8 introduces Dr. James Brussel, the psychiatrist who worked on the Langer Report, a document profiling the German leader Adolf Hitler. Brussel later went on to produce the highly accurate profile of the Mad Bomber of New York which led to the apprehension and conviction of the culprit, George Metesky. Chapter 10 is dedicated to the FBI, the organization which has made the greatest contribution to profiling in the fight against crime. There is also a detailed chapter dedicated to crime scene analysis dealing with photography, note-taking, Luminol, blood, hair, fibers, impressions, fingerprints, chain of evidence, the Locard Exchange principle, firearms and ballistics, autopsies, internal and external examinations, identifying skeletons, osteology and dentition, facial reconstruction, and entomology. There are also separate chapters on criminologists and psychiatrists and how they influenced profiling as well as a lively discussion on the four approaches of profiling. The author identifies these approaches as the diagnostic evaluation approach, the crime scene analysis approach, the investigative psychology approach and the geographical profiling approach. Each approach is discussed in detail and evaluated. The author supplements the theory by adding important case studies throughout which makes the book easy to read and to understand. It is a must have book for any student, law enforcement agent, criminologist or indeed anyone interested in Forensic Science and Criminology.
