It covers the ways in which the semantic web and the legal ontology of contract formation application to ecommerce are used to support legal and policy decision-making in the global economy.
goal of judicial decision-making is further developed by means of 10 frames of legal analysis as discovered by the author. With the philosophical theories of law serving as a reference, the frames of legal analysis include the semiotic theory of law (Wittgenstein, Makkonen), the coherence theory of law (Alexy, Peczenik, Dworkin), the new rhetoric and legal argumentation theory (Perelman, Aarnio), social consequentialism (Posner), natural law theory (Fuller, Finnis), and the isomorphic theory of legal reasoning (Bartky, MacCormick and the Stakeholder Test). At the end, seven key issues of legal epistemology are addressed, like the nature of law and legal argumentation.

To further develop the understanding of historical and philosophical interpretations of law, the author provides a lucid explanation of the procedural background of legal argumentation theory. The book is rich in examples from legal cases, explaining how the legal argumentation theory is applied in practice. The author also discusses the role of law in society and the role of the judge in the legal process. The book provides a comprehensive understanding of the legal argumentation theory and its application in the legal system.

This book will be of great interest to students and scholars of jurisprudence, communitarianism, and legal theory.
